1-800-JETTING

200 Gallon Platform Series

The **US Jetting 200 Gallon Platform Series** of High Pressure Jetting units is a modular component concept of heavy duty single axle trailers for the mounting of selected **US Jetting PumpSets**. This unique concept allows the customer to participate in the design and

selection of **US Jetting** units to match their specific performance and job requirements. The main design feature is a single 200 gallon water storage tank with additional structural capacity for the inclusion of a selected engine, pump and hose reel systems. The frame is constructed of welded tubular steel with a powder coated baked-on finish for years of durability. A single 6,000 pound rated Torque-Flex axle with LT-235/75-16 tires with an electric brake system ensures towing ease behind mid-sized service vehicles.

**US Jetting 4018 Hatz Silent Pak Pump Set
On 200 Gallon Series Platform**

Gen II Wireless Remote Control System (optional) combined with a 6 position swivel hose reel (standard) allow for easy single person operation.

**200 Gallon Platform Series
Standard Features**

- Jump Jet Pulsation System
- Swivel Hose Reel with 6 Locking Positions
- Hydraulic Powered Hose Reel with a Capacity of 700 Feet of ½ High Pressure Hose
- 500 Feet of High Pressure Hose
- Colored Safety leader Hose
- 3 Rear, 1 Forward RPD Nozzle
- 6 Rear Nozzle
- Tiger Tail Hose Protector
- Drain Jet Extension
- 2" Anti-Siphon Water Fill Connection
- Torque Flex Axle, 6,000 lb. Rated
- LT-235/75R16 Radial Tires on 6 Bolt Chrome Wheels
- Electric Brakes with Battery Backup Breakaway Activator or Hydraulic Over-Run Braking System
- Amber Electric Strobe Light
- Dual Lockable Tool Boxes with 8 Cu. Ft. of Storage.
- Tiger tail holder
- Water Level Gauge
- D.O.T. Compliant Light System
- L.E.D. and Analog Pressure Gauges
- Weather Proof Control Panel
- 2-5/16th Ball Hitch with Lock
- Easy Lube Axle Wheel Bearings

Choice of Foot Control Valve or Handheld Control for Gen II Wireless Remote Control Systems

**200 Gallon Platform Series
Optional Features**

- Gen II Wireless Remote Control System
- Anti-Freeze System
- Inlet Hose Reel for Water Supply
- Optional Special Paint
- Electronic Arrow Signboard
- Pintle Hitch

US Jetting 4018 Pump 4000 PSI @ 18 GPM

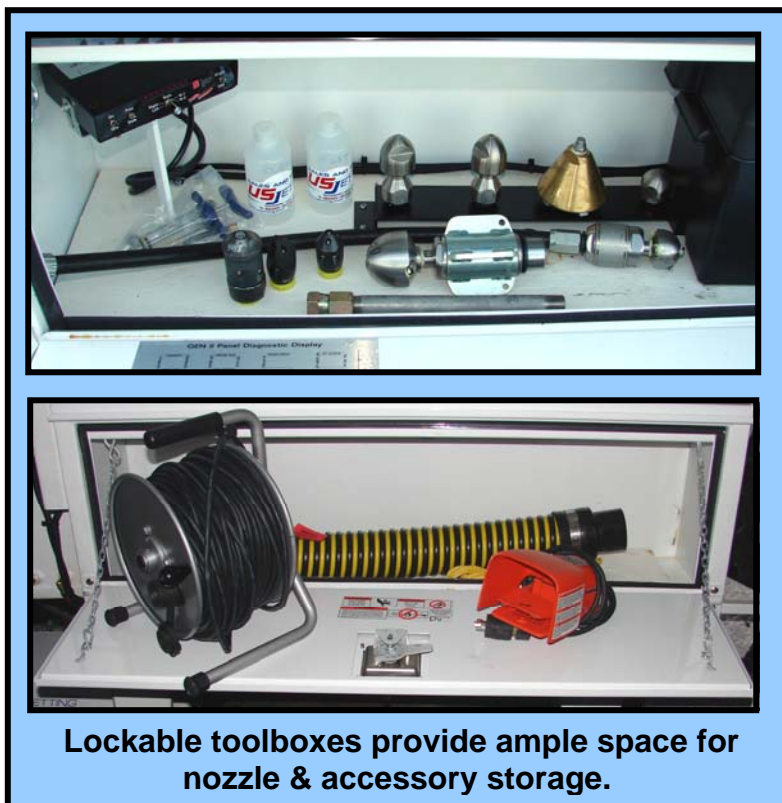

The US Jetting Pump

The key to **US Jetting** high pressure jetting units is the pump. The stainless steel fluid head with a proprietary **US Jetting** internal design provides reliable long term high pressure performance. The **US Jetting** Pump is so durable it can run dry without damage. When maintenance is required, seals and cartridge style check valves can be replaced in less than an hour.

A Few Words About the 200 Gallon Platform Series....

This series of **US Jetting** units have been a consistent performer for everyday use and specialized tasks. This compact unit can be towed by mid-sized service vans and pick-up trucks at highway speeds. The small size allows for access in factories, refineries and urban areas. Coupled with a constant water source, these units perform just as well as units with larger water storage capacity. The **200 Gallon Platform Series** has proven to be the top export model for **US Jetting**, with units operating in South America, Europe, the Middle East and Australia. The performance of these units is based upon the selected **US Jetting PumpSet**, not the water tank capacity.

Open & Accessible Control Panel

Lockable toolboxes provide ample space for nozzle & accessory storage.

Contact a *US Jetting* representative for an onsite demonstration and assistance in designing a *US Jetting* unit to meet your specific job requirements.
